

Update Features

1. Improved Master Tempo

The sound quality of the Master Tempo has been enhanced greatly
Better than CDJ-1000!

2. Better master slave operation and sync.

Resolved the lagging and performance of the Master slave operation with
the HDTT-5000's

3. Better file compatibility

Enhanced file compatibility and stability (requires deleting and re-creating
your database).

4. Foreign language character compatibility

Foreign id3 tags such as German language tags can be displayed correctly.

5. Auto loop mode can now also read BPM id3tag info

The Auto loop feature will be capable calculating the proper loop size using
the id3 tag BPM info (if information is available),so you can now make an
auto loop from the beginning of a song.

Other Enhancements (HDTT-5000)

Keyboard works for both sides off of Master

Resolved all looping bugs
